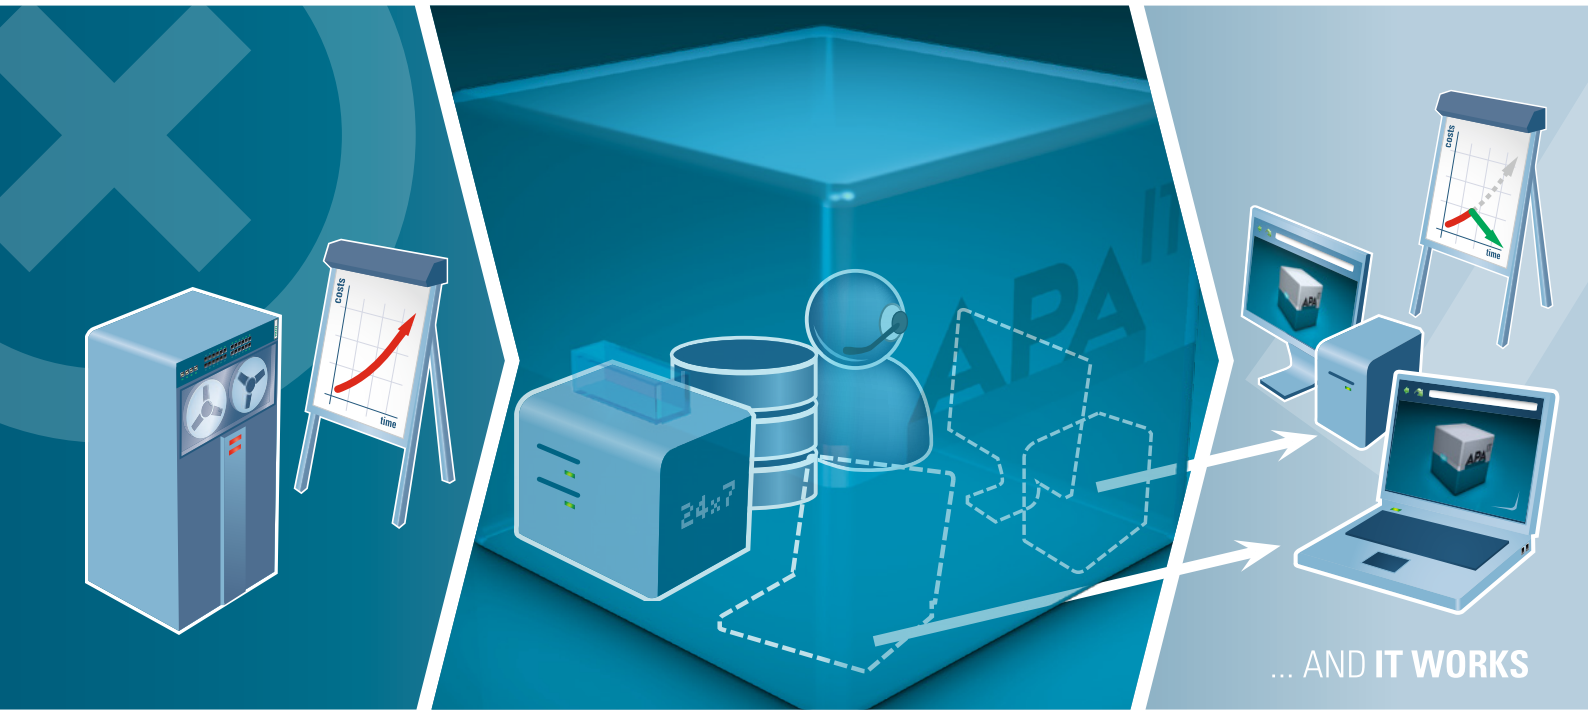
IT-INFRASTRUCTURE OUTSOURCING

IT-INFRASTRUCTURE IS THE BACKBONE OF EVERY COMPANY. A BREAKDOWN OF SERVER, PC, NETWORK OR OTHER DEVICES BRINGS NUMEROUS OPERATIONS TO A STANDSTILL – EVEN IF AT FIRST GLANCE IT OFTEN HAS LITTLE TO DO WITH THE CORE BUSINESS. FOR THIS REASON MANY SUCCESSFUL COMPANIES AND ORGANIZATIONS LEAVE THEIR IT MATTERS TO SPECIALISTS SUCH AS APA-IT.



HOW DOES IT WORK?

Whether desktops, laptops, network, servers or peripheral devices: after an initial discussion, APA-IT plans the outsourcing process in precise detail so the effort and costs for you are as minimal as possible. After transfer, the IT system is looked after by IT professionals. Thus the entire IT system lies in competent hands and you are able to focus on your core business.

APA-IT AS AN OUTSOURCING PARTNER.

At APA-IT a personal team assists you throughout the entire process. The team is also there for you after the IT transfer and provides you with advice and assistance during operation. Consequently, your IT system is kept up-to-date and optimally equipped for new standards. The technicians of the 24-hour support system are available around the clock. Requirements concerning availability, performance and security are developed and implemented in accordance with the defined service level agreement.
